(57) Abstract :

ABSTRACT MULTI MODEL DEVICES FOR LOGISTICS AND SUPPLY CHAIN MANAGEMENT An multi model devices for logistics and supply chain management apparatus for efficient tracking and tracing of material flows including effective handling processes is an significant approach to improving cost-efficiency throughout the supply chain, but it has also safety and security aspects. Both safety and security issues are increasingly important in the global business environment and in world trade. A logistics centre accounts for the final packaging, labelling, mass-customization and customer configuration of the ordered commodities prior subjecting them to the supply chain. RFID or UHF RFID is an AutoID technology that is tagged for tracking and tracing commodities throughout supply chains as the RFID tags enable item, pallet or container level tracking. AutoID services is either areal specific services or company-specific services. The multi-model devices employing AutoID promote multimodal supply chains by making them a more effective, secure and more appealing with transportation arrangement.
